

**The London
Sash Window
Company**

THE LONDON SASH WINDOW COMPANY

Our experienced team sympathetically restores and replaces traditional wooden windows and doors, each perfectly in-keeping with the style and period of your property.

We combine modern glazing techniques with traditional craftsmanship and attention to detail. Every window is beautifully made, highly efficient, and functions just as it should.

"While our business is rooted in tradition and heritage, we have incorporated modern materials and techniques to produce windows that not only look stunning, but that give our clients the high quality performance they require."

Simon Pavey,
Managing Director,
The London Sash Window Company.

OUR SERVICES

New Sash Windows

Where existing windows are beyond repair, reinstatement of historic windows required, or full replacements desired, we install complete new fully finished windows, including box frames, sashes, architraves, and linings to match period detail. Up to date performance and Certification as standard, or bespoke historic profiling where Planning restricted.

Double Glazed Sashes

Delivering high-performance and cost-effectiveness, old single-glazed sashes are retired for custom-made, fully double-glazed replacements, fitted with a full service including draught proofing. Retaining the historic box-frame, we completely overhaul the interior workings of the window, and add new furniture including security locks.

Overhaul & Draught Proofing

This gives your existing traditional windows a new lease of life as we carefully deliver a comprehensive service, replacing all sash cords, supporting components, and rebalance the counter-weight system. New window furniture and security locks are added. We will also carry out necessary remedial work such as repairing rotten wood and perished putty.

Secondary Glazing

Our secondary glazing offers maximum sound insulation whilst offering heat retention at the same time. Various opening styles and glass types can be combined to deliver best performance and sympathetic appearance.

Casement Windows

Our new casement windows offer all the benefits of modern performance, enhanced with subtle and secure multi-point locking systems. Warp resistant, durable timber is used to give long-term assurance, and ease of operation.

"We are very pleased with the final result. The fitter was highly professional and hard working and a credit to The London Sash Window Company. Thank you for dealing with our anxieties so professionally."

M Tarrant, Putney

Shutters

The widest possible choice of premium made-to-measure internal Venetian and flat panel shutters. Options include a broad selection of timber materials, colour, ironmongery, and styles to match your requirements.

French Doors

Our market leading French doors use the highest quality, warp resistant Accoya timber, combined with toughened glass and secure multipoint locking systems. A range of aesthetic options offer long-term door solutions which merge into all historic homes.

COMMERCIAL PROJECTS

Over the years, we have completed a wide variety of commercial projects across the residential development, hotel, and institutional sectors.

Whatever the size of project, our team of experts will always deliver the same level of dedication, knowledge, and professionalism.

Our flexible range of services and products, combined with a specialist knowledge of design and planning requirements, allow us to work with architects and designers to deliver a full scope for renovation and replacement.

Notable Projects

Regent's Crescent:

The London Sash Window Company delivered the largest ever replacement window program to a Grade I Listed group of buildings at Regent's Crescent in Central London. The crescent was designed by the renowned architect John Nash in the early 19th century.

Hotel Russell:

As part of the now Principle London Hotels we carried out a renovation and replacement programme to over 1200 windows and doors. The hotel sits in a prime location on the corner of Russell Square.
