

The London Sash Window Company

Belgravia SW1: Grade II listed family home

This impressive, grade II listed family home lies within the Crown Estate in central London. The client was keen to cut down on outside noise while maintaining the look of the current windows and, importantly, ensure that any alterations met strict guidelines set by its listed status.

Procedure: overhaul and sound proofing

A number of repairs were made to the current window frames before new made to measure sashes could be fitted. As the building was listed it was not possible to fit double glazing so acoustic glass was fitted to help with noise reduction and window furniture was also fitted. The installation provided new sashes that were in keeping with the original windows and satisfied listed building requirements.
