

# The London Sash Window Company

## Hampstead NW3

As part of a broader project including the installation of new sash windows, we were brought into to make and fit the right doors to suit a new rear extension.

### Procedure: fitting of bi-fold doors

We manufactured a set of impressive bi-fold doors in Accoya wood chosen because it is a material less prone to shrinkage and swelling. The timber mouldings of the doors were matched to the sash windows, were fully draught proofed and painted in Farrow & Ball Down Pipe Grey.
