

# The London Sash Window Company

## Mayfair W1

Set in Mayfair, just a five minute walk from Hyde Park and Green Park this block of serviced apartments had many old windows that needed attention.

### Procedure: overhaul and draught proofing

Although the windows did not require full replacement they did require significant maintenance to bring them up the condition guests would expect. In addition to an overhaul and draught proofing, extensive rot treatment and glazing repairs were carried out to both sash and casement windows.

This work was carried out by our commercial division and carefully scheduled to be completed while the apartments were free from visitors.
